

Consumer price indices

May 2009

Date: 16 June 2009

Coverage: United Kingdom **Theme:** The Economy

In the year to May, the consumer prices index (CPI) rose by 2.2 per cent, down from 2.3 per cent in April.

In the year to May, the all items retail prices index (RPI) fell by 1.1 per cent, compared with a fall of 1.2 per cent in April.

Over the same period, the all items RPI excluding mortgage interest payments index (RPIX) rose by 1.6 per cent, down from 1.7 per cent in April.

		CPI		RPI		RPIX	
		Index (2005 = 100)	Per cent change over 12 months	Index (Jan 1987 =100)	Per cent change over 12 months	Index (Jan 1987 = 100)	Per cent change over 12 months
2008	Dec	109.5	3.1	212.9	0.9	209.2	2.8
2009	Jan	108.7	3.0	210.1	0.1	207.5	2.4
	Feb	109.6	3.2	211.4	0.0	209.5	2.5
	Mar	109.8	2.9	211.3	-0.4	209.9	2.2
	Apr	110.1	2.3	211.5	-1.2	210.7	1.7
	May	110.7	2.2	212.8	-1.1	212.0	1.6

Further information on CPI is available at www.statistics.gov.uk/cpi

Main contributions to the change in the CPI 12-month rate¹

The largest downward contribution to the change in the CPI annual rate came from food and non-alcoholic beverages. The largest effect came from meat with prices rising by less than a year ago, particularly for bacon. There were small downward effects from vegetables and bread and cereals, where prices rose by less than a year ago, and from milk, cheese and eggs where prices were little changed this year but rose a year ago. These downward effects were partially offset by a large upward effect from fruit, where prices have risen by more than a year ago.

There was also a large downward contribution from housing and household services. The effect came principally from electricity bills, where tariffs fell this year but were unchanged a year ago. Within this division there was also a downward effect from liquid fuels where the price of heating oil rose by less than a year ago, reflecting movements in the price of crude oil. There was a further downward effect from housing rents where rents for private rented property fell this year but rose a year ago.

There was a small downward contribution from furniture, household equipment and routine maintenance, where prices overall rose by less than a year ago, particularly for furniture and furnishings.

The largest upward contribution to the change in the CPI annual rate came from alcoholic beverages and tobacco, where prices rose by more than a year ago, mainly reflecting the increase in excise duty from this year's budget. The effects of last year's budget were mainly seen in April.

A further large upward contribution came from recreation and culture. The effect came mainly from recording media where prices rose this year but fell a year ago, particularly for pre-recorded DVDs and from equipment for the reception and reproduction of sound and pictures, where television prices rose this year but fell a year ago. Partially offsetting these effects was a downward contribution from books where prices fell this year but rose a year ago.

There was a small upward contribution from clothing and footwear, where prices rose this year but were little changed a year ago.

Food and non-alcoholic beverages
CPI percentage changes over 12 months

Housing and household services
CPI percentage changes over 12 months

Alcohol and tobacco
CPI percentage changes over 12 months

¹ The CPI and RPI use different classification systems. Background Note 11 shows how, for each of the two indices, the main categories contributing to changes in the 12-month rate relate to each other.

CPI main contributions¹ to the change in the all items 12-month rate between April 2009 and May 2009 (-0.1 percentage points)

CPI comparison of the 12-month percentage changes

1. Individual contributions may not sum to the total due to rounding.

RPI main contributions¹ to the change in the all items 12-month rate between April 2009 and May 2009 (0.1 percentage points)

RPI comparison of the 12-month percentage changes

1. Individual contributions may not sum to the total due to rounding.

CPI main contributions¹ to the all items 12-month rate (2.2 per cent)

Main contributions to the all items 12-month rate (2.2 per cent)

The largest contribution to the 2.2 per cent 12-month rate came from food and non-alcoholic beverages. Overall prices rose by 7.8 per cent with the largest rises recorded against fruit, vegetables, meat, coffee, tea and other food products.

Housing and household services contributed 0.7 percentage points, principally from electricity and gas. Gas prices have risen by 23.5 per cent over the year and electricity prices have risen by 6.8 per cent.

Restaurants and hotels contributed 0.3 percentage points to the 12-month rate. Overall, prices rose by 2.5 per cent with the largest rise of 3.1 per cent recorded against restaurants and cafes.

In contrast, prices of clothing and footwear fell by 8.1 per cent over the 12 months to May and this had a downward pull of 0.5 percentage points on the rate.

1. Individual contributions may not sum to the total due to rounding.

RPI main contributions¹ to the all items 12-month rate (-1.1 per cent)

Main contributions to the all items 12-month rate (-1.1 per cent)

The largest downward contribution to the 12-month rate came from housing which had a downward pull of 2.9 percentage points. Overall, prices fell by 11.5 per cent on the year with the main contributions coming from mortgage interest payments and house depreciation.

Motoring also had a downward pull of 0.6 percentage points on the 12-month rate. Overall, prices fell by 4.3 per cent over the year due to falls in the prices of motor vehicles and petrol and oil.

The largest upward contribution to the 12-month rate came from food which contributed 0.9 percentage points. Overall prices rose by 7.8 per cent with the higher price rises recorded against processed fish, sugar, lamb, pork, coffee, and processed fruit.

Leisure services contributed 0.4 percentage points to the 12-month rate. Overall, prices rose by 5.6 per cent over the year mainly due to rises in the price of foreign holidays.

1. Individual contributions may not sum to the total due to rounding.

Background Notes

Relevance

1. The consumer prices index (CPI) is the main United Kingdom domestic measure of consumer price inflation for macroeconomic purposes. It forms the basis for the Government's inflation target that the Bank of England's Monetary Policy Committee (MPC) is required to achieve.
2. Internationally, the CPI is known as the Harmonised Index of Consumer Prices (HICP). HICPs are calculated in each Member State of the European Union, according to rules specified in a series of European Regulations developed by Eurostat in conjunction with the EU Member States. HICPs are used to compare inflation rates across the European Union. Since January 1999 it has also been used by the European Central Bank (ECB) as the measure of price stability across the euro area.
3. The retail prices index (RPI) is the most long-standing general purpose measure of inflation in the United Kingdom and is available from June 1947. It is used for a variety of purposes by both government and external users including the indexation of various incomes and prices and the uprating of pensions, benefits and index-linked gilts.

Methodology

4. The CPI and the RPI are compiled using the same underlying price data, based on a large and representative selection of around 650 individual goods and services for which price movements are measured in around 150 randomly selected areas throughout the UK. Around 120,000 separate price quotations are used every month to compile the indices. The outlets in which the prices are collected are selected randomly. Expenditure weights are held constant for one year at a time.
5. The selection of goods and services that are priced to compile the CPI and RPI is reviewed annually. The contents of the 2009 basket are described in an article published on the National Statistics website at: <http://www.statistics.gov.uk/cci/article.asp?ID=2156>
The expenditure weights used to compile the indices are also updated each year. Additional details of the updated CPI and RPI weights for 2009 are available from the National Statistics website in an article entitled Consumer Prices Index and Retail Prices Index: Updating Weights for 2009: <http://www.statistics.gov.uk/cci/article.asp?ID=2172>
6. Rates of change for the CPI are calculated from unrounded index levels, rather than from the published indices, which are rounded to one decimal place. The use of unrounded indices increases the accuracy of the calculation. The unrounded index levels are available on request. By contrast, rates of change for the RPI are calculated from the published rounded indices.

Reliability

7. Once the RPI indices are published they are never revised. CPI indices are revisable although past revisions have been minimal with the exception of those arising from re-referencing of the CPI to 2005=100, which took place with the publication of the January 2006 indices.

Comparability

8. The CPI's coverage of goods and services was extended in stages in the areas of health, education, childcare and insurance, with effect from the January 2000, 2001, and 2002 indices. In 2000, there was also a change to the population basis for the weights which was broadened from private households to include expenditure by foreign visitors and residents of institutional households. Further details can be found in a series of articles:
http://www.statistics.gov.uk/about/methodology_by_theme/cpi
9. The official CPI series starts in 1996 but estimates for earlier periods are available back to 1988. These estimates are broadly consistent with data from 1996 but should be treated with some caution. The following article provides more detail:
<http://www.statistics.gov.uk/cci/article.asp?ID=31>
10. RPI data are available back to 1947 but have been re-referenced on several occasions since then, generally accompanied by changes to the coverage and/or structure of the detailed sub-components. Details of these changes are given in Appendices 1 and 2 of the CPI Technical Manual: <http://www.statistics.gov.uk/statbase/Product.asp?vlnk=2328>

Coherence

11. The CPI and RPI both measure the average change from month to month in the prices of consumer goods and services purchased in the UK. However, they differ in both coverage and methodology. A detailed description of these differences is given in an article entitled "The New Inflation Target: the Statistical Perspective":
www.statistics.gov.uk/StatBase/Product.asp?vlnk=10913. The differences are summarised below:
 - In the CPI, the geometric mean is used to combine the individual prices into elementary indices at the most basic level whereas the RPI uses arithmetic means
 - The CPI excludes a number of RPI series mainly relating to housing costs (for example, council tax), and in particular to owner occupiers' housing costs (including mortgage interest payments, house depreciation and buildings insurance). In addition, the CPI excludes the annual road fund licence and, from 2006, TV licences which are classified as taxes in the UK National Accounts, and Trades Union subscriptions which by convention are not part of household expenditure
 - The CPI includes series for university accommodation fees, foreign students' university tuition fees, and unit trust and stockbrokers' charges, none of which are included in the RPI
 - The CPI is categorised according to the international classification system, COICOP (Classification Of Individual Consumption by Purpose). The way in which this maps to the RPI groupings is shown in the following table:

COICOP Divisions	RPI Groups
01 Food & non-alcoholic beverages	Food
02 Alcohol & tobacco	Alcoholic drink (off sales) Tobacco
03 Clothing & footwear	Clothing & footwear
04 Housing & household services	Housing (exc. mortgage interest payments, depreciation, council tax & building insurance) Fuel & light
05 Furniture & household goods	Household goods Domestic services
06 Health	Personal goods & services (health-related items)
07 Transport	Motoring expenditure Fares & other travel costs
08 Communication	Household services (exc. domestic services & fees and subscriptions)
09 Recreation & culture	Leisure goods Leisure services
10 Education	Fees & subscriptions (education-related items)
11 Restaurants & hotels	Catering Alcoholic drink (on sales)
12 Miscellaneous goods & services	Personal goods & services (non health-related items) Fees & subscriptions (non education-related items)

- The index for the purchase of new cars in the CPI is quality adjusted and based on actual published prices for new cars. New car prices in the RPI are imputed from movements in second hand car prices
- The CPI weights are based on expenditure by all private households, foreign visitors to the UK and residents of institutional households. In the RPI, weights are based on expenditure by private households only, excluding the highest income households and pensioner households mainly dependent on state benefits

- In the construction of the CPI weights, amounts paid out in insurance claims are distributed among the COICOP headings according to the nature of the claims' expenditure, with the residual (the service charge) being allocated to the relevant insurance heading. For the RPI weights, total expenditure (that is, gross of claims paid out) is assigned to the relevant insurance heading

12. A breakdown of the difference between the CPI and RPI annual rates of inflation is shown in Table 10 of the CPI First Release.

Accessibility

13. This release includes the May 2009 data, collected on 19 May 2009. Future publication dates are 14 July, 18 August, 15 September, 13 October, 17 November and 15 December. The European Commission (Eurostat) released figures for the harmonised index of consumer prices (HICP) for the month of May 2009 for EU member states excluding the UK, together with an EU average, on 16 June 2009. Further information on HICP for the European Union, Eurozone and other EU Member States is available from Eurostat's HICP web page: <http://epp.eurostat.ec.europa.eu/portal/page/portal/hicp/introduction>

Further information

14. A more detailed quality report for this First Release is available at: <http://www.statistics.gov.uk/CCI/article.asp?ID=1585>

15. A full description of how the CPI and RPI are compiled is given in the Consumer Price Indices Technical Manual 2007 edition: <http://www.statistics.gov.uk/statbase/Product.asp?vlnk=2328>

General

16. Details of the policy governing the release of new data are available from the press office. Also available is a list of the names of those given pre-publication access to contents of this release.

17. Complete runs of series in this release are available to download free of charge at: <http://www.statistics.gov.uk/timeseries>

18. **National Statistics** are produced to high professional standards set out in the National Statistics Code of Practice. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference. © Crown Copyright 2009

Key: - zero or negligible

2 The taxes excluded are council tax, VAT, duties, vehicle excise duty, insurance tax and air passenger duty.

1 Inflation rates prior to 1997 and index levels prior to 1996 are estimated. Further details are given in Economic Trends No.541 December 1998. These details are also available on the National Statistics website: www.statistics.gov.uk/cci/article/asp?ID=31

3 The taxes excluded are VAT, duties, insurance premium tax, air passenger duty, stamp duty on share transactions.

¹ Inflation rates prior to 1997 and index levels prior to 1996 are estimated. Further details are given in *Economic Trends No. 541 December 1998*. These details are also available on the National Statistics website: www.statistics.gov.uk/cpi/article.asp?ID=31

² The coverage of these categories was extended in January 2000; further extensions to coverage came into effect in January 2001 for health and miscellaneous goods and services; the coverage of miscellaneous goods and services was further extended with effect from January 2002 (details are given in a series of *Economic Trends* articles available on the National Statistics website: www.statistics.gov.uk/cpi)

¹ For further information on the composition of the indices shown, see 'The Consumer Prices Index: Goods and Services Indices and Special Aggregates', which can be downloaded from: www.statistics.gov.uk/cpi/article.asp?id=1060

² The coverage of this special aggregate has changed extensively since January 2000, when Social protection was first included and extensions to the Education and Health divisions also took effect. Health was further extended with effect from January 2001. Details are given in a series of Economic Trends articles available on the National Statistics website: www.statistics.gov.uk/cpi

1 Published as the CPI in the UK.

2 The EICP (European Index of Consumer Prices) is the official EU aggregate. It covers 15 member states until April 2004, 25 member states from May 2004, and 27 members from Jan 2007, the new member states being integrated using a chain index formula.

The EU 25 annual average for 2004 is calculated from the EU 15 average from January to April and the EU 25 average from May to December.

3 The coverage of the European Union was extended to include Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia from 1 May 2004 and Bulgaria and Romania from 1 Jan 2007.

4 The coverage of the Monetary Union Area index was extended to include Greece with effect from Jan 2001 and Slovakia from January 2009.

1 The differences due to housing, coverage and formula effect are all calculated independently and are not additive.

Source: National Statistics

2 Difference due to use of different formulae to aggregate prices at the most basic level.

3 This difference is derived as a residual.
