

## **RMT Guidance document**

### **OLYMPICS AND PARALYMPICS**

**All drivers please be aware that management currently state that there will be no NORMAL duty sheets or rosters generated by Duty Schedules over the Olympic and Paralympic period. Special OLYMPIC and PARALYMPIC duty sheets are in the process of being produced which will allocate duties to staff in the same way as allocating bank holiday duties.**

**This will be done in the normal way involving local elected RMT reps.**

As has been previously stated the RMT has no agreement with London Underground for this period and our position remains the same – there should be no breaches of the framework agreements – no exceeding the normal driving parameters.

LISTED BELOW ARE THE MAIN PRINCIPLES AS TO HOW RMT INDUSTRIAL REPS NEED TO ALLOCATE DUTIES DURING THIS PERIOD.

FOLLOW THE BULLET POINTS BELOW AND IF YOU HAVE ANY ISSUES PLEASE CONTACT YOUR FUNCTIONAL REP'S STRAIGHT AWAY.

- RMT industrial reps will take part in the allocation of ALL duties on the Sunday to Saturday rosters.
- RMT industrial reps will make sure that ALL drivers are given an even spread of duties within the Monday to Friday roster, and are to ensure that the same names DO NOT keep coming up on the dead late duties that work past 01:30.
- RMT industrial reps will ENSURE that with regard to the Saturday and Sunday duties ALL RMT drivers are ONLY allocated duties up to the normal working parameters, and are NOT to be allocated to any shift that breaches the framework agreement.
- Under the PTOA Appendix 3a and 3b there is provision for overnight running for the opening ceremony and for late shifts to work up to one hour later only, but RMT have not agreed to our Framework being broken.

***NO RMT DRIVER IS TO BE ALLOCATED ANY SHIFT EXCEEDING HIS OR HER PARAMETERS ON A WEEKEND OR INVOLVES 6 TUNNELS ON THE BAKERLOO LINE.***

**THE RMT CONTINUES TO SEEK A SETTLEMENT WITH LUL WHICH WILL MEET OUR MEMBERS ASPIRATIONS FOR A SAFE RAILWAY PROPERLY RENUMERATED.**

IF IN ANY DOUBT ABOUT THE ABOVE CONTACT YOUR FUNCTIONAL REPS
