

A promise is a promise...

In Getting London Moving Johnson pledged to "put the commuter first...by halting the proposed Tube ticket office closures, and ensuring there is always a manned ticket office at every station".

And during his election campaign (*above*) he signed a petition opposing ticket-office closures and calling for those already closed to be re-opened.

Help us **stop** the Mayor's plan to cut 800 Tube station staff

This Friday (23rd of April) RMT members including your local rep, will be handing out leaflets to the public outside Liverpool Street station as part of our Staff Our Stations campaign to prevent London Underground from getting rid of 800 jobs and undermining the safety of staff and the safety and convenience of passengers.

It is vital that as many of you as possible attend to show the public and other members how grave a threat these plans are, and to show managers how seriously we take our jobs!

We will gather and begin @ 1pm
